

Energy

Summary

This category encourages the specification and design of energy efficient building solutions, systems and equipment that support the sustainable use of energy in the building and sustainable management in the building's operation. Issues in this section assess measures to improve the inherent energy efficiency of the building, encourage the reduction of carbon emissions and support efficient management throughout the operational phase of the building's life.

Assessment issues

Ene 01 Energy performance	9 credits + 2 exemplary
Ene 02 Prediction of energy use in operation	4 credits + 2 exemplary
Ene 03 Energy monitoring	2 credits
Ene 04 Energy-optimised design	5 credits
Ene 07 Flexible demand response	2 credits
Ene 08 Installed controls	2 credits + 1 exemplary
